Education

2022 - 2026

B.Tech Computer Engineering

Pimpri Chinchwad College Of Engineering, pune

2021

Hsc- XII

Dnyantirth International School and Junior College of Science

Skills

- **Programming Languages & Frameworks:** HTML, CSS, JavaScript, PHP, Python, Java, C, C++, React, Angularjs, Node.js, MERN, PERN
- **Databases:** MySQL, MongoDB, PostgreSQL
- **Cloud:** AWS, Firebase

Language

English

Marathi

Hindi

Prathamesh Bhutkar

Final-year B.Tech Computer Engineering student passionate about developing scalable full-stack solutions. Proficient in JavaScript, HTML, CSS, and React.js for building responsive front-end components, with experience in Node.js for robust backend development and REST API integration. Familiar with MongoDB, Firebase, and MySQL, committed to writing clean, efficient code, and adept at debugging.

Projects

Lost & Found Tracker Web Application

- Developed a full-stack, interactive web platform for lost and found item management using HTML, CSS, JavaScript, and Google Firebase (Auth, Firestore, Storage).
- Implemented robust features including user authentication (login/signup, profile management), secure real-time chat, item categorization, advanced search filters (keywords, location, category), item bookmarking, and abuse reporting.
- Designed a responsive UI/UX with modern aesthetics and animations, ensuring a seamless and engaging user experience across devices.
- Demonstrated strong proficiency in both front-end and back-end development, including database integration (Firebase as a NoSQL database) and API utilization.
- Showcased problem-solving skills in developing complex features and ensuring application reliability and stability.

LingoMate - Real-Time Chat Web App with Translation

- Developed a social chat platform using JavaScript, allowing users to create accounts, send friend requests, and chat securely.
- Integrated Gemini Translate API for real-time message translation, solving language barriers in multilingual conversations.
- Implemented secure communication and real-time features, demonstrating strong front-end and back-end development skills.

Credit Card Fraud Detection System

- Developed a machine learning model using Python, Scikit-learn, and XGBoost to detect fraudulent credit card transactions.
- Handled data imbalance using SMOTE and evaluated performance using ROC-AUC and F1 score.

EXTRA CURRICULAR ACTIVITIES

Head of Photography Team - SDW Cell, PCCOE;

- Managed event photography for all college activities.
- Coordinated with design and media teams to ensure timely content delivery, highlighting effective communication.

Cerificates

AI Foundation Bootcamp

FutureSkills PRIME MeitY & NASSCOM

Feb 2025

Learned core AI concepts including ML algorithms, neural networks, and ethical AI; trained on practical applications through a governmentbacked initiative.

AWS Academy Graduate - AWS Academy Cloud Foundations

Completed foundational training in Amazon Web Services (AWS) cloud computing, covering core AWS services, security best practices, and architectural principles.
